

# QUASAR<sup>6</sup>

Self-levelling cross line laser for levelling, aligning, plumbing and marking right angles

®

Precise surveying  
and measuring

Made in Germany

## QUASAR<sup>6</sup>

Self-levelling cross line laser for levelling, aligning, plumbing and marking 90° angles. Four vertical laser lines and one horizontal laser line generate a cross on one wall and on the ceiling. An additional plumb beam transfers the cross from the ceiling to the floor. Suitable laser for interior finishing and exterior applications.

### Features:

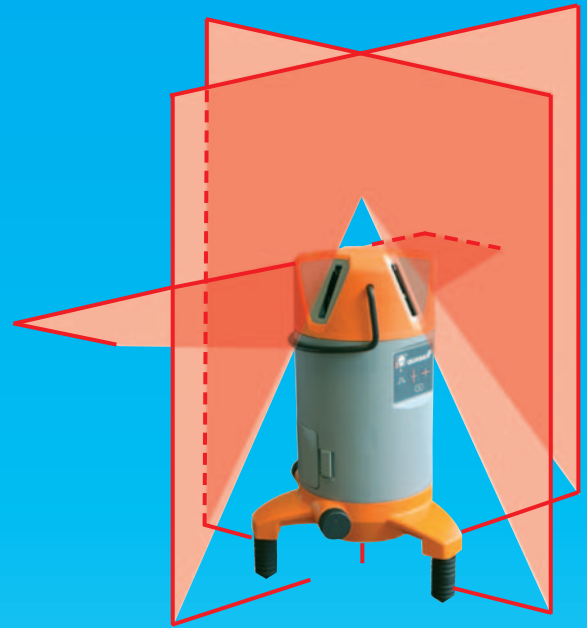

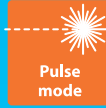

- Highly visible laser beams; can be switched on separately
- Reliable self-levelling function
- Compensator lock for transportation
- Tangent screw for fine adjustment
- Reliable magnetic damping
- Rugged design with shock protection system
- Pulse mode for outdoor use with laser receiver
- Quick charge, max. 2.5 h to charge batteries
- Run charge function
- 5/8" thread

### Scope of delivery:

- Cross line laser **QUASAR<sup>6</sup>**
- Laser glasses
- Target board
- Rechargeable batteries and charger
- Case

Ref.-No.  
460 930

### Technical data **QUASAR<sup>6</sup>**:

Accuracy	± 3 mm/10 m
Self-levelling range	± 3.5°
Laser	laser class 2M, 635 nm
Working range	25 m without receiver 50 m with receiver
Power supply	rechargeable batteries NiMH, 2300 mAh
Operation duration	approx. 15 h
Protection class	IP 54
Weight	1.5 kg
Ref.-No.	460 930

### Technical data laser receiver (optional accessory):

Working range	approx. 5 m - 50 m
Operation duration	approx. 50 h
Power supply	9 V battery
Length of detector field	20 mm
Display	LC display on front and back
Audible signal	switched off
Protection class	IP 54
Ref.-No.	430 326-613

**QUASAR<sup>6</sup>** Set incl.:  
Cross line laser, laser receiver  
**ACCEPTOR<sup>line</sup>** with rod clamp, target  
board, laser glasses, rechargeable batteries  
and charger and case  
Ref.-No. 460 932
